BWT Domestic UV Water Treatment WRAS approved

Ultraviolet Disinfection Units - BWT S Series UV Systems

Disinfection of water without chemicals

What is an Ultraviolet Unit?

A high grade stainless housing containing an ultraviolet tube and a protective quartz sleeve. The size of the unit is dependent on the amount of water being treated. Smaller units treat lower water flows and are best installed on the cold feed to a single tap e.g. kitchen sink. Larger units treat higher flows and are suitable for installation on the incoming mains pipe offering whole house protection.

Primary Purpose

To disinfect drinking water without using chemicals so that living contaminants such as e-coli, cysts and bacteria are completely eliminated

Features and Benefits

Economical - low power consumption

Easy - simple to operate

Safe - no hazardous chemicals to store or use

Destroys most waterborne bacteria and viruses, including e-coli, coliforms, campylobacter, legionella and pseudomonas

Environmentally friendly

Important note

BWT UK Limited cannot guarantee 100% removal of waterborne bacteria, parasites or organic chemical. Water supplies must be verified as safe to drink by a competent and qualified person(s). A suitable pre-filter must be fitted prior to your UV installation, if you would like advice on the most suitable one for your application please contact us.

Model No. S55ND

Connections 3/4" BSPT Male

Flow Rate at 300J/m² (m³/hr)/(l/m)- 2.8/47
1

Flow Rate at 400J/m² (m³/hr)/(l/m)- 2.1/35
