Details

The Wrappa is an electronic water conditioner that uses radio frequencies to alter the characteristics of hard water. Once conditioned by the Wrappa, limescale simply passes through a domestic hot water system without sticking to heat exchange surfaces.

WxHxD: 100x170x40mm. 15-35mm pipe. Power 230v/50hz.

When used in a hard water area, the Wrappa can extend the life of household hot water appliances such as shower units or hot water cylinders.

The Wrappa can also remove existing scale from a system.

Single appliance or whole house protection

Helps lower heating bills (reduces scale)

Water remains potable

Little maintenance required

Costs less than £5 a year to run

No plumbing required

Removes existing scale - works on most piping material including plastic pipe

This is not a water softener it is a scale inhibitor product which will prevent scale build up on pipework and heating elements.
